

The Solid Core Foundation via Optimized Business Processes

Enterprise Core Operations (ECO) focuses on continuous improvement of your company's core business processes related to Financial, Logistic and Human Capital Management areas. In this era of the globalization of the economy, liberalization of markets and ever-increasing competition, it is vital to achieve maximum efficiency throughout your organization. There is a perception that this is a difficult and costly process, hence our strong belief to "Keep it simple" and work with small teams of high-end, experienced, industry-recognized thought leaders, resulting in reduced implementation costs and total cost of ownership, not to mention the related frustration of cost overruns.

Let us help you to increase your operational efficiency by reducing and eliminating waste of time and resource, reducing and avoiding unnecessary costs, and removing bottlenecks and errors in your business processes.

IncQ Consulting ECO provides the following services to achieve these goals:

- **SAP ECC Greenfield Implementations:** The highly experienced consultants from IncQ will help you to successfully implement all required SAP ECC modules and business processes according to SAP best practices and a proven delivery methodology.
- **International Roll-outs and Localization of Templates:** With our presence in all major Southeast Asian countries, we can help you to roll out your template to these countries and localize it to the country specific legal requirements where necessary.
- **Re-implementations and Upgrades:** We will assist you in upgrading to the latest SAP ECC version and add new functionality where needed. In the case of a re-implementation, our consultants with 10+ years of experience will assist you and guarantee implementation according to SAP Best practices in your industry.
- **Business Process Re-engineering:** Let us help you to optimize your business processes and bring your organization to a higher and more efficient level.
- **Mergers and Demergers:** Mergers and demergers have an impact on your SAP environment. We can help you incorporate these changes in your SAP system(s).
- **Health Checks:** We analyze your current SAP system set up and usage to determine inefficiencies and potential bottlenecks in the execution of your business processes. We will perform root cause analysis and come up with recommendations as to how this can be corrected and improved.
- **Support:** Our support consultants facilitate permanent operations support for your organization. This support includes installation of fixes and upgrades, adjusting configuration, tuning, problem determination and resolution.
- **Training:** Our training consultants will partner with the business to facilitate constant knowledge improvements and to help you with an SAP refreshment course. For a more permanent solution build a training solution in SAP E-learning. See IncQ's E-learning collateral.

TAKE THE NEXT STEP IN YOUR ENTERPRISE CORE OPERATIONS JOURNEY
